

Full-stack software engineer with 5+ years of experience delivering scalable, user-facing solutions with recent focus on agentic tooling and LLM integration. Skilled at translating ambiguous requests into clear, user-centered solutions by uncovering root issues, defining success metrics, and aligning outcomes with business needs.

## WORK EXPERIENCE

### Alarm.com - Denver, CO

*Senior Software Engineer* | Apr 2026 - Present

*Software Engineer II* | June 2022 - Mar 2026

- Owned the design, development, and roll-out of a business-critical internal tool handling over ten million live production accounts with a focus on performance and reliability. Directly unblocked over a dozen key projects and business partner opportunities.
- Developed and deployed company-wide agentic AI tooling, including an MCP-integrated internal knowledge base, custom MCP skills, and Jira agents that autonomously triage and resolve backlog tickets. Led internal training on agentic coding and AI best practices.
- Led initiatives to standardize accessibility testing and documentation processes, improving workflows, cross-department productivity, and overall UX posture.
- Mentored interns and junior developers, and refined team onboarding processes to accelerate integration of new hires and reduce time-to-contribution.

### Epic Systems - Madison, WI

*Software Developer* | Aug 2020 - Jan 2022

- Coordinated with stakeholders to rapidly enhance vaccine capture-and-reconciliation workflows in MyChart's Vaccination History and Questionnaire feature, serving millions of users during the COVID-19 pandemic.
- Migrated internal web app from Angular 1.x to Angular 12 and established CI/CD pipeline via GitLab to improve code maintainability and accelerate feature delivery timelines.
- Led full-stack development and project management for a novel telehealth self-triage feature, designing and implementing a dynamic decision-tree traversal engine for symptom-based care routing.
- Refactored core patient data capture workflows, authored a comprehensive testing suite, and created internal documentation to support team knowledge-sharing.

## TECHNICAL SKILLS & NOTABLE PROJECTS

- Languages** | TypeScript, JavaScript, C#, Python, SQL, HTML, CSS
- Frameworks & Libraries** | React, Ember, Angular, Node.js, Tauri
- AI & Tooling** | Claude API, MCP & Plugin Development, Agentic Workflows, Prompt Engineering, GitHub API
- HYPR-VISR** | Personal to-do list and note-taking app built in React and Tauri (Rust) providing local-first data storage and available on multiple platforms.
- Vibecheck** | React web app that leverages the Spotify Web API to allow users to visualize and drill-down on key audio features for any artist, album, or playlist.
- Cloudinator** | Python cloud automation platform that allows developers to deploy and manage Linux-based applications. Senior Design Project at NCSU mentored by Michael DeHaan (Ansible co-founder).
- Co-Author**, "Do I really need all this work to find vulnerabilities?", Empirical Software Engineering 27, 154 (2022).
- Co-Author**, "Structuring a Comprehensive Software Security Course Around the OWASP Application Security Verification Standard", ICSE-JSEET 2021.

## EDUCATION

**Bachelor of Science, Computer Science Major and Statistics Minor**

North Carolina State University | Raleigh, NC | Summa Cum Laude | University Honors Program

May 2020
